

CLEARTRAK NRX

OTTO®

Intrinsically Safe Protection

Over-the-head | Behind-the-head | Helmet mounted

ClearTrak NRX is the next generation of industrial-grade intrinsically safe headset for high noise environments. Combining contemporary design with proven OTTO quality, the ClearTrak NRX is a comfortable, reliable headset providing clear audio and hearing protection. Intrinsically safe and ATEX-rated, ClearTrak NRX is certified for use in hazardous areas that require a headset, providing an NRR of 24db and satisfying many OSHA compliance needs.

The ClearTrak NRX is made for work. The rugged coiled cable stays out of the way, and the durable helical boom is ready for any on-the-job adventure, and replaceable if it gets too adventurous - or if it's slammed in a truck door. Earcup-mounted push-to-talk (PTT) is easy to reach and provides tactile feedback for use with gloves. Finally, easily replaceable ear seals snap in for true comfort and longevity.

FEATURES:

- Snap-in easy change ear seals
- Upgradeable ear seals
- Rugged Coiled Cable
- Tactile PTT on earcup
- Helical boom for consistent placement
- Replaceable boom assembly
- Compatible with Kenwood two-pin radios

Additional Kenwood, Harris, and Nexus connectors available Summer 2022

SPECIFICATIONS:

- Noise Reduction Rating (NRR): 24dB
- Intrinsically Safe/ATEX certified
- Microphone sensitivity rating: -47 dBV Typical
- Operating temperature range : -30 C to +75 C
- 3-year warranty
